

Beau Masterson
Ancillary Services Director
SageWest Health Care
Riverton, Wyoming

Biography: Beau Masterson was born in the beautiful bluegrass state of Kentucky. He moved to the Hoosier state (Indiana) where he graduated from high school through Jeffersonville High School's vocational welding program. He graduated from Spencerian College with an Associates Degree in Applied Science, Ottawa University with his undergraduate in Medical Administration, and eventually his Masters of Business.

Beau has been involved in cutting edge imaging throughout his career to include the first ever double hand transplant, research studies for macular degeneration, and fatty livers. Beau moved to Riverton and has accepted management of multiple departments at SageWest Health Care to include imaging, laboratory, respiratory, sleep, cardiac and pulmonary rehabilitation.

Workshop: *Imaging the Body with Magnets?* - Learn about how we can image the smallest area of the human body using a large super conducted magnet and Radiofrequencies. Also hear some of the dangers involved with a high filed magnet and see some cool images of real human pathology.
