

Jennifer Burrell
Infection Preventionist
SageWest Health Care
Riverton, Wyoming

Biography: Jennifer Burrell attained a Bachelor's Degree in Biology and Integrative Therapeutic Practices, as well as a Master's Degree in Health Sciences and is Board-certified in Infection Control. She has served as an Infection Preventionist for the past five years, making sure healthcare workers and health facilities are doing all the things they should to prevent infections from spreading. Throughout her life, Jen has an enthusiasm for all things science and looks forward to passing along information to the next generation of professionals.

Jana Favela
Laboratory Medical Technologist
SageWest Health Care
Riverton, Wyoming

Biography: Jana Favela had a calling to serve our country and went into the United States Marine Corps right out of high school. At 28, Jana returned to school and attained an Associates in Science in Biology from Central Wyoming College and then an Associate's in Science as a Medical Laboratory Technician from Casper College. Then, Jana attained a Bachelor's in Science Degree from the University of Wyoming in Microbiology and Medical Laboratory Science. She is originally from Michigan and has lived in Riverton for the past nine years with her husband and daughter.

Workshop: *Patient Management and Keeping Everyone Safe in the Hospital* - Our SageWest team will be providing a case study of a patient who enters the hospital from hand hygiene with an interactive glow germ visual to the background information technology systems involved in the patient's electronic medical record and looking at the involved hardware. In addition, we will make a diagnosis of the patient and take lab and imaging tests. How does all that happen? Once the patient is diagnosed with their illness, how do the caregivers keep themselves safe with the personal protective equipment involving the procedure of putting on and removing personal protective equipment as caregivers of this patient.
