Alex Sivitskis
Education Research Faculty & Professional
Learning Coach
Teton Science Schools
Jackson, Wyoming

Biography: Alex is originally from the small town and glaciated landscapes of Princeton, Massachusetts. After completing his undergraduate studies in Earth sciences, he began a career in environmental education through an AmeriCorps position in Casper, Wyoming. Alex first joined Teton Science Schools in 2018 as a participant in the graduate program. He completed a Master's degree in Natural Science Education from the University of Wyoming. From 2019-2021, he was teaching place-based education, GIS, and remote sensing at The Royal University of Bhutan and other nonprofit organizations through a fellowship with TSS.

Workshop: *Mapping Our World: Uncovering Changes with Geospatial Technology* - Earth is always changing, and satellites give us a powerful way to observe those changes from space. In this hands-on workshop, you'll use geospatial technology and interactive mapping tools to explore real-world environmental patterns. Analyze how landscapes transform over time, from the impact of wildfires to shifts in water use. Discover how you could use a career in geospatial science to help address global challenges, spark innovation, and shape the future of our planet.
